

## ROSÉ 2023

Carl and his wife Carla established 'Down to Earth', a grape growing viticulture company in Margaret River. It was here the team developed, managed and acquired a large collection of vineyards across Western Australia. The viticulture team pushed the limits to achieve the best quality produce for each site and season. But, they began to grow envious, believing some of the parcels of fruit were too good to give away. So, they decided to start turning our best parcels into quality wines to enjoy the fruits of their labour.

## TASTING NOTE

Produced from Margaret River Tempranillo, this wine displays a delicate but complex bouquet of lifted ripe strawberries, sherbet, rose petals and hints of guava with touches of sea salt and white pepper.

The well-balanced palate is refreshing, crisp and layered with flavours of pink grapefruit juicy raspberries, pomegranate, musk sticks and persistent pink grapefruit ending with a spiciness on the finish typical of the Tempranillo variety this wine is made from.
